15. comprehensive and deep literature review
16. comprehensive and interdisciplinary literature review
17. comprehensive critical review
18. comprehensive informatics-based systematic review
19. comprehensive literature review (CLR)
20. comprehensive, non-systematic review
21. comprehensive review
22. comprehensive systematic literature review
23. comprehensive visualized literature review
24. computational literature review (CLR)
25. consise review
26. content-driven review
27. critical literature review
28. critical review
29. critical systematic review
30. data-driven literature review
31. decade review
32. dedicated literature review
33. detailed review
34. detailed literature review
35. evidence reviews
36. exhaustive literature review
37. exhaustive review
38. exploratory literature review
39. extensive literature review
40. factual comprehensive review
41. focused literature review
42. framework-based literature review
43. global systematic literature review
44. grey literature review
45. holistic review
46. human-centered systematic literature review
47. hybrid systematic review
48. integrated review

49. integrative literature review
50. integrative review
51. intelligent literature review
52. intensive literature review
53. interdisciplinary systematic literature review
54. living systematic review" (LSR)
55. machine learning-augmented systematic review
56. machine learning-assisted systematic review
57. manual literature review
58. mini literature review
59. mini review
60. multilayer review
61. narrative review
62. narrative literature review
63. non-exhaustive review
64. non-systematic review
65. original systematic review
66. potential technologies review
67. rapid Evidence Map (rEM)
68. rapid reviews
69. rapid literature review
70. retro- and prospective review
71. retrospective review
72. review of reviews
73. rich literature review
74. scientometric review
75. scoping review
76. scoping systematic literature review
77. semiautomated systematic literature reviews
78. short literature review
79. smart literature review
80. standard systematic literature review
81. state-of-the-art review
82. statistical review
83. structured literature review
84. systematic evidence review
85. systematic bibliometric literature review
86. systematic evidence review
87. systematic literature review (SLR)
88. systematic-narrative hybrid literature review
89. systematic research review
90. systematic scoping review
91. technology assisted review
92. text mining-based review
93. text mining literature review
94. thorough literature review
95. thorough review
96. up-to-date systematic literature review
97. wide literature review
